

WE ARE HIRING

Acoustic Engineer – Shanghai

- **Location:** Based in Shanghai, China with involvement in international projects
- **Starting Date:** No later than the end of November 2026
- **Contract Type:** Full-time
- **Applications & enquiries:** contact.asia@acoustique-delhom.com

Who We Are

For more than **30 years**, Delhom Acoustics has been one of the leading acoustic consultancies, supporting complex projects across the world through a combination of French engineering expertise and strong local and international adaptability. Our consultants advise and support project teams from **early design to project completion**, working closely with architects, engineers, developers, brands, and operators to develop tailored, high-performance acoustic strategies.

What We Are Looking For

Based in **Shanghai**, this position offers the opportunity to work on high-quality building, environmental, and industrial projects within an **international consulting environment**.

In close collaboration with global clients and Delhom's worldwide teams, the role involves **developing thoughtful technical approaches**, adapting to diverse project contexts, and progressively taking ownership from early design to final completion.

It is suited to engineers who combine **technical expertise** with a **consulting mindset** and are motivated by responsibility, collaboration, and long-term project impact.

Desired Profile

- Master's degree (or equivalent) in **Acoustics Engineering** or a related field
- **2 to 5 years of experience** in an acoustic consultancy or engineering office
- Technical background in **building and environmental acoustics**
- Ability to manage **multiple projects** and meet deadlines
- Experience working within **multidisciplinary construction teams**
- Responsible, autonomous, proactive, and **quality-oriented mindset**
- Strong **communication and interpersonal skills**
- **Fluent English** is required; Mandarin proficiency is appreciated but not mandatory

Responsibilities

- Managing acoustic consultancy projects from **concept design to construction completion**, and in coordination with international teams
 - Responding to **client enquiries** and participating in **tenders and proposals**
 - Analysing project briefs and preparing **technical and commercial offers**
 - Producing **acoustic reports**, specifications, and technical documentation
 - Conducting **acoustic modelling, simulations, and on-site measurements**
 - Performing studies in compliance with **local and international standards**
 - Coordinating with **internal teams and external partners** across regions, and developing strong relationships
-

What You'll Find When Working at Delhom Acoustics

- A **passionate, multicultural, and supportive** working environment
 - Close collaboration with teams in **France, Vietnam, the Middle East, and Asia**
 - A culture based on **trust, learning, and growing**
 - Opportunities for **technical and professional development**
 - The chance to work on **meaningful projects** that improve people's daily environments
-
